COMMERCIAL POOL CLEANERS

AstralPool commercial pool cleaners offer features and performance like no other cleaner on the market. Its modern styling and advanced 21st Century technology gives our commercial pool cleaners the ability to clean any Olympic or commercial size swimming pool.

AQUA SMART SYSTEM

Aqua Smart System is an intelligent program for robotic pool cleaners that aids the unit to fully cover and efficiently clean any commercial swimming pool.

A very smart mathematical algorithm installed in the brain of the machine enables the robot to cover the pool in a systemized fashion and without wasting time.

The robots, equipped with the Aqua Smart System, can change direction on the pool's bottom without any additional mechanical devices.

GYRO

Gyro (Gyroscopic Navigation System) is a new intelligent algorithm developed to improve navigation of the robot. Using only systematic turning patterns it prevents cable tangling and most importantly maximize cleaning coverage efficiency.

FINE MESH FILTER BAG

The fine mesh filter bag has the capacity of trapping extremely small particulate and microscopic algae with only few microns in diameter.
